Horizon Freight System Expands Licensing Agreement with Trinium to Deploy Trinium-TMS to Its National Network of Intermodal Trucking Terminals

Horizon Freight System, a national intermodal trucking company based in Cleveland, Ohio has expanded its licensing agreement with Trinium after a successful pilot project. Horizon Freight System provides intermodal trucking services in over 35 markets throughout the states with a fleet of over 650 drivers. **Trinium Technologies** is a software company that specializes in driving financial improvements for intermodal trucking companies.

Horizon is replacing a system that was not equipped to efficiently manage intermodal trucking operations with owner operators and third party agents. Due to the rapid growth over the past few years, the company decided to pursue a system upgrade. After evaluating several enterprise applications for the trucking industry, Horizon selected Trinium.

"We were looking for a system that provided functionality specific to the needs of an intermodal trucking operation. We also required a system that could scale to manage hundreds of users across dozens of dispatch sites. We were pleasantly surprised with Trinium's industry experience and the functionality of the system" said Mark Solari, administrative operations manager, of Horizon Freight System.

Horizon initially piloted the system with a few dispatch sites in the Midwest. The pilot also included interfaces to Horizon's document imaging system and financial accounting system. After the successful pilot project, Horizon expanded its licensing agreement with Trinium to deploy the system to the remaining Horizon dispatch sites.

"We are very excited to have Horizon as a long term business partner and we're looking forward to working with their management team in driving greater efficiency throughout their operations. We also feel this further validates our position as the leading provider of intermodal trucking software in North America" said Dennis Lane, vice president of sales and marketing of Trinium Technologies.

About Horizon Freight System

Horizon Freight System, founded in 1983, has become one of the country's most stable, fastest growing and dependable intermodal carriers. By 2004, the company had grown to operate terminals in more than 35 major cities throughout the United States. Horizon has a fleet of over 650 trucks to service our customers. www.horizonfreightssystem.com
