Stagecoach Cartage & Distribution Launches Trinium's Transportation Management System

Stagecoach Cartage & Distribution, a leading truckload, LTL, and intermodal trucking company, based in El Paso, TX has purchased and deployed *Trinium-TMS* to manage its intermodal trucking business units. Stagecoach's intermodal divisions provide rail dray based services throughout the U.S. Southwest. **Trinium Technologies** specializes in driving financial improvements for intermodal trucking companies.

Stagecoach started the implementation of *Trinium-TMS* in late 2006 and is now "live" with Trinium's software solution. The company purchased several Trinium sub-modules including Trinium's EDI Module, and Event Management Module. Trinium will enable Stagecoach to improve empty container tracking, reduce per diem/detention costs, and provide automated delivery messaging and visibility information to their customers.

"Stagecoach has become well known for our quality services in all modes of trucking, including intermodal, truckload, and LTL. Our approach with technology is to operate the best of breed operational solutions in each of the transport and distribution markets that we service. Trinium provides the best intermodal functionality that we've seen in the market" said **Scott McLaughlin**, President of Stagecoach Cartage & Distribution.

"We are thrilled to work with Stagecoach in setting high standards for intermodal trucking, operational best practices. Partnering with quality operators, like Stagecoach, has enabled us to grow the functionality of our products and to secure the position as the leading software vendor in the intermodal trucking industry" said **Dennis Lane**, Vice President of Sales & Marketing, Trinium Technologies.

About Stagecoach Cartage & Distribution

Stagecoach Cartage and Distribution, Inc is an integrated company that provides a full range of transportation and warehousing services. Stagecoach was recognized in *INC*, Magazine as one of the 500 fastest growing companies in the United States.
